Hello,

It takes immense pleasure for me to introduce my company to you. PIONEER CHICORY is an offspring of the family "PAGALAM" which is active in the chicory business for the past 70 years. The company is involved right from the importation of seeds, contract farming, post-harvest processing and industrial processing. The company is also actively involved in sales & distribution both in the Indian market and the overseas market through self-owned distribution offices and through partner companies.

In this product catalogue due to space constraints I have only included the short description & application of the products. But if you require, pls. do not hesitate to contact me for technical specifications, process flow chart and packing formats.
